Remarks:

- The results mentioned above are only related to the sample received by the laboratory.
- Limits of communication of all compounds per method are available in the client-section of www.primoris-lab.com
- U: the expanded measurement uncertainty U (by multiplying the measurement uncertainty with factor 2 what produces a 95% reliability interval) is expressed as % of the analysis result x. Result to be read as x + - U.
- The measurement uncertainty is mentioned next to each found compound. In case of # it is for pesticides 50%, compliant with SANTE/11813/2017 E10.
- For pesticides the process factor (concentration factor) of dried, concentrated or processed products, should be used to recalculate the analytical result before comparing it with the legal limits (that are valid on unprocessed products).
- PRIMORIS can not be held responsible for any errors in the legal regulation mentioned in this report. These are made available solely for the purpose of information and refer to the products as specified in the applicable legislation.
- (*): tolerance not assignable, see relevant legislation.
- This certificate of analysis may not be reproduced, except in entire form with a written permission of the management.
- This certificate was produced electronically and is valid without manual signature. Name and function of the responsible of this document was provided on the basis of a secure and personalized login procedure. Additional manually signed copies of this document can be produced on individual demand.
- This certificate is generated under the authority and accreditation (BELAC 057-TEST/ISO17025) of "PRIMORIS Holding", Technologiepark 2/3, B-9052 Zwijnaarde - Gent, Belgium
- A: compound under accreditation
- GC-MSMS-LOW Tetrahydrophthalimide : metabolite of captan used as trigger for additional captan analysis
- Captan: if triggered by THPI positive, analysed by GC-ECD
